The XIth Practical Course in Laparoscopic Urology

Dear Colleagues and friends

The Scandinavian Academy of Minimally Invasive Surgery (S*A*M*I*S) cordially invites you to Aarhus to attend the XIth annual practical course in Laparoscopic Urology, September 1st – September 3rd, 2010.

The course will cover different aspects of laparoscopic urology and will mainly focus on practical issues such as technical skills, instrumentation, energy sources, and safe intra-corporeal suturing and knotting. The course is aimed at delegates who are already familiar with basic laparoscopic principles and will be an invaluable brush up for the adult and paediatric urologist.

With this eleventh annual course in Laparoscopic Urology, and especially as robotic surgery has become a mainstay in urological practice, robotic surgical mentoring has been extended to cover two full days for interested participants. New and emerging laparoscopic technologies which undoubtedly will crossover to everyday practice will also be discussed and evaluated.

We have again assembled a highly experienced faculty of Scandinavian and European laparoscopists, who will demonstrate, supervise, and lecture on topics that include

- Computer simulation
- Black box training
- Retroperitoneal access to the kidney and ureter
- Transperitoneal access to the kidney and ureter
- Intra-corporeal suturing techniques
- Dismembered pyeloplasty
- Heminephrectomy / Partial nephrectomy
- Nephrectomy
- Laparoscopic living donor nephrectomy
- Laparoscopic radical prostatectomy
- Robot assisted urology
- L.E.S.S = Laparoendoscopic single-site surgery
- S.I.L.S. = Single Incision Laparoscopic Surgery
- N.O.T.E.S. = Natural Orifice Transluminal Endoscopic Surgery
- Break out session for paediatric urologists

During the course, training procedures will be supervised and repeated a sufficient number of times to allow trainees to get an adequate understanding and sense for the demonstrated techniques. Friday afternoon, the participants will have the opportunity to try a single incision procedure. The number of participants, in the animal lab, is limited to 18, with 3 participants per pig.

Faculty

- Mark Sullivan, Oxford, UK.
- Christian Brown, London, UK
- Bjørn Edwin, Oslo, Norway.
- Peter Elfving, Malmö, Sweden.
- Anette Ryslev, Aarhus, DK
- Øyvind Østeraat, Aarhus, DK
- Yazan F. Rawashdeh, Aarhus, DK.
- Ejvind U. Poulsen, Aarhus, DK.
- Lars Henning Olsen, Aarhus, DK

As has been the tradition, the course will be held to coincide with the festivities of the annual Aarhus Festival Week, which encompasses a wide variety of cultural activities. Delegates can therefore look forward to enjoying the late-summer evenings of the city while in its prime.

We look forward to seeing you in Aarhus

Organizing committee

Lars Henning Olsen (Chairman), Yazan F. Rawashdeh & Henrik Sørensen.

Venue

The XIth Practical Course in Laparoscopic Urology will be held at the facilities of the Institute of Clinical Medicine, Aarhus University, which are located at Aarhus University Hospital - Skejby.

Registration form - Deadline June 15th, 2010

Please complete and return this form to the secretary Birthe Bundgaard, Department of Urology, Aarhus University Hospital Skejby, 8200 Aarhus N, Denmark. Fax +45 89496006, e-mail birtbund@rm.dk
